LET US WALK TOGETHER, FOR THIS IS THE RIGHT TIME FOR DEVELOPMENT

We are very happy to place before you “Vikasa” BJP’s Manifesto for 2013 Elections for legislative assembly.

You gave us a 5 year mandate to govern in 2008. You made the first BJP government in Karnataka much more responsible and eternally vigilant by leaving us on the threshold of majority. We accepted your challenge whole heartedly.

It was a mammoth and challenging task to put the state of Karnataka on the path of development from the decades of deep slumber it was in. We have efficiently governed the state for 5 years. It is our firm and honest belief that we have been an instrument of change and have initiated hundreds of developmental projects unseen and unheard of in Karnataka in the last 5 decades. We are placing before you the various programmes initiated by us for the progress of the State.

BJP Government on the Path of Development

We made several promise in our 2008 Manifesto “Sankalpa”. We have earnestly implemented most of them. You are fully aware some such initiatives have succeeded beyond our own expectations. Some such programmes like 2 Rs. Subsidy per litre of milk to milk producers, “Bhagyalakshmi” bonds to girl child, distribution of uniforms and bicycles to school children, and many more popular programmes are right before you. The financial health of the state is better than ever. “Global Investors meet” has rejuvenated the industrial sector by attracting huge investments. Many new policies covering new and contemporary issues have been framed and adopted. The entire Nation watches with awe our achievements in E-Governance. The achievements in the field of Transport, Health, Water,

Rural development and implementation of MGNREGA have been outstanding. Are we patting our own back? Various awards and recognitions conferred on the state by the Central Government and prestigious International organisations are a mirror to our achievements.

Time bound deliverance of various government services through introduction of "Sakala" has now become a model for the whole country. Highly successful "Bhoo-Chetana" programme to increase soil fertility and productivity have been replicated in countries like Bangladesh and Philippines. We are proud of implementing popular and pro people programmes such as "Vajapeyee Arogyashree" and "Suvarnabhoomi" schemes to reach out to the people of the state.

Rural and Urban development are like two eyes of progress. BJP government in Karnataka has set a new record by announcing a separate agriculture budget for the first time in the country besides initiating several revolutionary programmes for urban development. A balanced and community oriented development without discriminating between Villages and Cities, Educated and Uneducated, Men and Women, Castes and Religions has been our proud achievements.

A balanced approach to development has been internalized by BJP since its birth.

Our brief History

Totally disillusioned with the drudgery of Congress, Dr. Shyam Prasad Mukherjee started Bharatiya Janasangh in 1952. He dreamt of building a vibrant India and Mahatma Gandhiji's RamaRajya. His "Ekatma Manavatavada" – Integral Humanism provided the conceptual framework for realization of the dream "Bhavya Bharat". We have evolved as "Bharatiya Janata Party" in 1980 having been chiefly responsible for formation of Janata Party during emergency. We have built a party of Karyakartas and people at the grass roots.

BJP is the only party working harmoniously on the foundation of five commitments to Cultural Nationalism and National Integration, Democratic Values, Integral Humanism, Equality of Religions and Value based Politics. BJP believes in building exploitation free Bhavya Bharat where the people treated equal and just.

Can we forget the era between 1996-2004, led by great visionary Sri. Atal Bihari Vajpayee, shaping India into able and powerful country? The achievements of BJP led NDA Government in the areas of Employment Generation; Housing, Kisan

credit cards, Telecom revolution, LPG connections, Highway construction, Food production etc are unparalleled. It was this BJP under the able leadership of Sri Atalji that this country took great strides in the areas of National Security, International Relations, Empowerment of armed forces, Pokharan Atomic Explosion, Victory in Kargil war, progress in science and technology, revolutionary Golden Quadrilateral etc. is remembered with pride.

Where does the Nation stand today?

The UPA Government in power since 2004 is rated as the most corrupt government since independence by development experts, media and you! UPA government is directly responsible for 2G scam, coal scam; helicopter deal the list is endless. The people of this country will never forget or forgive the congress which encouraged the loot of the country and posted a puppet prime minister against the mandate. It is real that the UPA Government is breathing its last after sending their cabinet ministers to Jail on corruption charges by CBI.

Karnataka's commitment

The Karnataka State is going to polls once again under these conditions. A new government has to be constituted. It is our earnest appeal to bring back BJP to power for having provided a stable and effective government for last 5 years in spite of internal dissensions. Chief Ministers may have changed but the governance was never compromised. It is BJP's firm resolve that the commitment of the people representatives is first to the Nation, then to the people and then to the ideals of the party.

Your firm resolve to give a fresh mandate to BJP would help us speed up all the developmental initiatives taken during the last 5 years. BJP has corrected many wrongs perpetrated during the 5 decade misrule of congress. We need to take firm steps for the overall development of Karnataka. Come; let us tread the developmental path together.

So, we are presenting this "VIKASA" before you. Please bring back BJP to power by voting for the lotus sign on 5th may 2013 and assert your right for development.

Come, It is time for development. Let us walk the path together.

Jai Karnataka, Jai Hind.

ACHIEVEMENTS OF BJP GOVERNMENT

2008-2013

Agriculture

- A significant increase in agricultural productivity in spite of flood and draught. A productivity increase of 35.4% during 11th 5 year plan compared to 10th 5 year plan
